LANGUAGES

Java	C++	C#
JavaScript	Python	MYSQL
PHP	BASH	Lua

ANDROID SKILLS

Material	Android	RxJava
Unit Test	Dagger	Git
Firebase	MVC/MVP	Restful
XML	JSON	oAuth

WEB SKILLS

WordPress	Laravel	jQuery
AWS	Gulp	React
SCSS	LESS	VueJS
NPM	Angular2	

PROJECTS

Material Reddit

An android application for users to browse through Reddit using the Material Guidelines provided by Google.

Stack: RxJava/Android, Butterknife, Picasso, Retrofit, Support Library.

MDS Invoice Manager

Created a two-part system in which I took the companies old invoicing system and turned it digital. Installers using a mobile system (Android Application) were allowed to scan incoming vehicles and upload that to the back-end which allowed them to create an invoice which would then be sent out to Dealerships. The application consisted of a Website built using Laravel and a Mobile Application which was built using Android.

Stack Android: RxJava, Realm, ButterKnife, Dagger, Lombok, OkHttp
Stack Web: Laravel, PHP, Nginx, MYSQL, AWS, jQuery, VueJS, Bootstrap

WORK HISTORY

MOBILE DEVELOPER as a Freelance Contractor
Los Angeles, CA ▪ 2014 to current

Currently working freelance developing both mobile and web applications.

WEB DEVELOPER at Groovi Deals
Santa Fe Springs, CA ▪ 2013 to 2014

Worked as a full stack developer for an eCommerce company maintaining both a WordPress Website and custom built portal where the company stored warehouse data. In addition to maintaining the main site I also worked on adding various different modules at the request of staff.
